

Azure Arc-enabled data services

Cloud experience for data workloads anywhere

Common challenges on-premises

- ⚠️ Patching and upgrades
- ⚠️ Manual DBA tasks
- ⚠️ Scaling on demand
- ⚠️ No unified view on data assets
- ⚠️ Data security & governance
- ⚠️ Cost management

Run Azure data services across on-premises, multi-cloud and edge

Get Azure innovation, cloud benefits and a flexible cloud billing model across your data estate with **Azure Arc-enabled data services**

Support all connectivity modes

Always current
Automated updates
Evergreen SQL

As-a-Service
Built in HA/DR
Automation at scale

Elastic scale
Scale up, scale out
Hyperscale Postgres

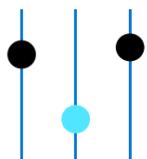

Unified management
Single pane of glass
Consistent workflows

Cloud experience for data workloads anywhere

Any hardware, any Kubernetes

Better cost efficiency

Flexible cost structures
Choose between allocating costs as
Opex or Capex

Lower TCO
Reduce costs with built-in capabilities
and increase productivity from
automation at scale

Reusable investments
Leverage existing infrastructure,
environments and SQL Server licenses

Hybrid data scenarios

Extending and migrating existing apps

Drivers: Existing investments, TCO

Cloud automation, always up-to-date for on-premises databases

Database-as-a service with cloud billing model for on-premises databases

Hybrid governance and security across on-premises and multi-cloud

Consistent, portable databases on Kubernetes

Compute, real-time insights when data is created

Building new cloud native apps

Drivers: Digital transformation, compliance, latency

"Azure Arc enabled data services provides a Database-as-a-Service model for us to better serve our customers like OPET, which need to **run data workloads outside of Azure but still get all the Azure innovation and cloud benefits.**"

Evren Dereci
Chief Marketing Officer
Koc Sistem

"SKF is proud to be at the forefront of the hybrid cloud revolution. Azure Hybrid Cloud Solutions enable us to maximise our efficiency, grow our digital platform for world class manufacturing and empower the SKF Factories of the Future to innovate towards data driven manufacturing."

Sven Vollbehr
Head of Digital Manufacturing
SKF Group

"Using Azure Arc enabled data services, I'm able to deploy multiple databases with the same exact configuration versus having a bunch of different sizes and flavors out there."

Kristina Melo
SQL Database Administrator
Ferguson
