

LOCATION

is at the heart of everything

Geospatial data is becoming more critical for...

Urban mobility

IoT

Field service

Logistics

...which requires

Route optimization

Asset tracking

Location Intelligence

Azure Maps

Azure Maps is a portfolio of geospatial service APIs that enable developers, enterprises and ISVs to create location aware apps and solutions. Familiar REST APIs and a JavaScript Map Control help enable customers to get their products out the door quickly

Choose Azure Maps

In-vehicle use licensing rights

Commercial Routing

Built in Azure

End to end location aware solutions on Azure

Functionality in over 30 languages

Best in class traffic data

Services

The following capabilities are available with the service:

Maps

Map data across many geographies

Map Control

Easily Integrate mapping capabilities into applications
