

## Azure Stack Hub – Datacenter integration partner ecosystem

Partners around the globe delivering validated software solutions for Azure Stack Hub simplifying the path to production-ready cloud infrastructure in your datacenter.

### Data protection and disaster recovery

Operators and users of Azure Stack deploying applications and datasets need the ability to quickly recover from data loss and catastrophic failures. With offerings from multiple partners, you can enable data protection and disaster recovery for your applications and data. These offerings have been tested in Microsoft or partner labs with ASDK and multi-node integrated systems.

- Solution brief - [Cohesity Simplify Secondary Data and Apps Solution Brief](#)
- Overview - [Data Management for Your Enterprise's Azure Stack](#)

## Security

Operators and users of Azure Stack need the ability to protect their solutions against cyber threats. With offerings from multiple partners, you can gain security insight into your Azure Stack infrastructure; you can also leverage solutions in the Azure Stack marketplace to protect your workloads running on top of Azure Stack. These offerings have been tested in Microsoft or partner labs with ASDK and multi-node integrated systems.

## Qualys

- General information – [Total visibility of your public cloud deployments](#)
- Overview – [Get a single-pane view across Microsoft Azure and Azure Stack](#)
- Press release – [Seamless integration delivers single-pane-of-glass view across Microsoft Azure and Azure Stack](#)

## Networking

### Arista

- General information – [Arista Any Cloud Platform](#)
- Press release – [Arista Extends Hybrid Cloud Networking Solution for Microsoft Azure Stack](#)
- Marketplace – [Arista vEOS Router](#)

### Barracuda

- General information – [Barracuda Solutions for Microsoft Azure, Manage Hybrid Cloud / On-Premises Environments](#)
- Marketplace
  - o [Barracuda CloudGen Firewall for Azure](#)
  - o [Barracuda CloudGen Firewall Control Center](#)
  - o [Barracuda CloudGen WAF for Azure](#)
  - o [Barracuda Email Security Gateway](#)
  - o [Barracuda WAF Control Center](#)

### CheckPoint

- General information – [Advanced Cloud Security with Check Point CloudGuard IaaS](#)
- Press release – [Check Point Extends Advanced Security to Microsoft Azure Stack](#)
- Technical documentation – [vSEC for Microsoft Azure Stack](#)

- Solution Brief – [Comprehensive Security Protections for Azure Hybrid Clouds](#)
- Marketplace – [CloudGuard IaaS - Firewall & Threat Prevention](#)

## F5

- General information – [Microsoft Azure](#)
- Overview – [Azure Stack Support – Expanding F5’s Multi-Cloud Ecosystem](#)
- Press release – [Hybrid Cloud Realized: F5, Azure and Azure Stack](#)
- Technical documentation – [Microsoft Azure Stack: Single NIC BIG-IP VE](#)
- Solution brief – [F5 Application Services in Microsoft Azure and Azure Stack](#)
- Blog – [Enhanced Performance and Security in Microsoft Azure Stack with F5 and Hewlett Packard Enterprise](#)

## Palo Alto

- General information – [Protect Azure Deployments](#)
- Technical documentation – [About the VM-Series Firewall on Azure](#)
- Marketplace – [Palo Alto Networks VM-Series](#)

## Positive Technologies

- Data sheet – [Positive Technologies Application Firewall](#)
- Marketplace – [PT Application Firewall](#)

## Migration

Azure Stack has ISV solutions for every stage of application migration, from envisioning/discovery to modernization by leveraging PaaS capabilities. Each have their own capabilities and improve the process in their own way

## Carbonite

- Offers server migration, backup and high availability of Windows Servers, and Enterprise protection for Microsoft Windows endpoints
- <https://www.carbonite.com/cp/partnership/microsoft-azure>
- <https://dev.carbsite.io/data-protection-resources/resource/Video/migrate-to-azure-and-azure-stack>

## Cloudbase

- Offers a “migration as a service” solution called Coriolis - <https://cloudbase.it/coriolis/>
- Coriolis is able to integrate with Azure Migrate and to use it for the initial assessment as well as the VM-size mapping and such - <https://www.youtube.com/watch?v=ytRW034iueE>

- [Coming Soon] Coriolis will be available as a trial version in the Azure Stack Marketplace, offering free VM migrations to validate the process and make sure it is the right solution.

#### Commvault

- Complements migration, management, protection and activation of data on Microsoft Azure Stack and other hybrid cloud infrastructure, helping enterprises increase agility, reduce costs and discover valuable insights
- <https://www.commvault.com/news/2018/april/commvault-expands-microsoft-azure-stack-integration>
- Commvault is available in the Azure Stack Marketplace and it offers a 60-days free trial that can be upgraded in place to a full version

#### Corent

- Offers a “migration as a service” solution - <https://www.corenttech.com/SurPaaS-Migration-As-A-Service.html>
- Published cases studies:
  - o [https://www.corenttech.com/images/downloads/CBN\\_Cloud\\_Azure\\_Stack\\_Migration-Case\\_Study.pdf](https://www.corenttech.com/images/downloads/CBN_Cloud_Azure_Stack_Migration-Case_Study.pdf)
  - o <https://globenewswire.com/news-release/2018/09/21/1574413/0/en/Calligo-delivers-successful-migration-to-Azure-Stack-using-Corent-Technology-SurPaaS-platform.html>

#### Billing and cost analysis

Billing and cost analysis tools allow Azure Stack administrators to allocate usage charges to departments and individual users of their system, supporting chargeback in the enterprise, and billing of end users for service providers

#### Azure Cost Management

Azure Cost Management is a set of tools integrated in the Azure portal that help you monitor, allocate and optimize your cloud costs.

- General information: <https://azure.microsoft.com/en-in/services/cost-management/>

#### Exivity

Exivity provides a metering and billing solution which can integrate with virtually any data source (Azure EA, Azure CSP and Azure Stack).

- General information – [Azure Stack Billing Automation with Exivity](#)
- Azure Marketplace – [Exivity - Hybrid Cloud Billing Solution](#)

#### Cloud Assert

Cloud Assert Billing for Azure Stack offers a flexible resource consumption-based billing solution integrated within the Azure Stack portal to enable true pay-as-you-billing, invoices and payments. With

Cloud Assert Billing for Azure Stack, Enterprise service administrators, Service providers and Microsoft Cloud Solution Provider (CSP) partners can define multiple pricing models within Azure Stack for all available services, resource meters, plans and offers. The solution is also extensible to support billing for resources residing outside of Azure Stack (e.g., VMware, System Center / Hyper-V).

- Overview – [Solutions - Azure Stack - Usage and Billing](#)
